

FARMERS IN CABINET

Farmers May Yet Be Included in Mackenzie King's Cabinet

Great interest is taken locally in the newly constructed Liberal cabinet. It was expected that men prominent in the ranks of the Progressive party would be given cabinet positions but this has not been done although, with possible additions later, premier Drury of Ontario or Hon. Mr. Areray may yet be given a portfolio. Without the support of the farmers' party, Mr. King is not likely to find it an easy task to "carry on."

A press despatch from Ottawa gives the following information regarding the new King cabinet:

On Thursday afternoon Hon. W. L. Mackenzie King, Liberal leader, was sworn in as prime minister. His cabinet slate is as follows:

Alberta—Hon. Chas. Stewart, minister of the interior, superintendent-general of Indian affairs, minister of mines.

B. C.—Hon. Hewitt Bostock, M.A., minister of public works.

Manitoba—No cabinet representation is given this province.

New Brunswick—Hon. A. B. Copp, L.L.B., secretary of state.

Nova Scotia—Hon. W. S. Fielding, L.L.D., D.C.L., minister of finance; Hon. D. Mackenzie, minister without portfolio and solicitor-general.

Ontario—Hon. W. L. M. King, C.M.G., M.A., L.L.B., L.D., prime minister and secretary of state for external affairs, president of the privy council; Hon. G. P. Graham, minister of militia and defense and minister of naval service; Hon. Charles Murphy, B.A., K.C., postmaster-general; Hon. T. A. Low, minister without portfolio; Hon. W. C. Kennedy, minister of railways and canals; Hon. James Murdoch, minister of labor.

Prince Edward Island—Hon. J. E. Sinclair, minister without portfolio.

Quebec—Hon. Raoul Dandurand, L.L.D., K.C., minister without portfolio; Hon. Henri S. Bolland, B.A., M.D., minister of soldiers' re-establishment and minister in charge of the department of health; Hon. Sir Lomer Gouin, K.C., M.G., L.L.D., minister of justice; Hon. Jacques Bureau, L.L.B., minister of customs and excise; Hon. Ernest Lapointe, B.A., L.L.B., K.C., minister of marine and fisheries; Hon. James Alexander Robb, minister of trade and commerce.

Saskatchewan—Hon. W. R. Motherwell, minister of agric.

Annual Meeting of Myrtle School District

The annual meeting of the Myrtle School District, No. 3772, will be held in the school on Thursday, January 12th, at 2 o'clock sharp.

J. MAWDSLEY, Sec. Treas.

Meeting of the Collholme Municipal Council

A meeting of the council of the municipal district of Collholme, was held in the Collholme school on Wednesday morning of last week.

All members were present, and after the reading and adoption of the minutes it was decided to release the lien on half the saleable portion of Mr. Lovegren's crop so that he may make a payment on account of his arrears of interest to the North of Scotland Canadian Mortgage Co., providing they are willing to carry Mr. Lovegren for another year and that he place the grain in store in name of the municipality and also that the municipality handle the disbursements pertaining thereto.

It was decided to strike off the charge of \$3.00 for destruction of weeds against the N.E. of 21-26-9 and west 0 4th mer.

The bill of \$3.80 for destruction of weeds is to be charged against the N.W. of 24-27-9 w. 4.

The preliminary agreement covering road diversion on N. E. of 4-26-9 west 4th was accepted.

Foreclosure proceedings will be commenced on chattel mortgage given by Carl Hagens in favor of the municipality.

The polling stations for the election to be held latter part of February will be as follows: Division 1, at J. Rasmussen's, S. 4 25-26-7. Division 3, at R. Goodwin's, N.E. 21-26-9. Division 5, at J. L. Massey's, S. 15-28-7. J. M. Davis will be returning officer.

A number of accounts were ordered paid after which the meeting adjourned to meet again in the Collholme school on Feb. 22

New Masonic Officers

On Tuesday evening of last week the officers of Crocus lodge, A. F. & A. M., were installed at Youngstown. The following are the new officers:

W. W. Isbister I.P.M.
L. S. Dawson W.M.
M. L. Chapman S.W.
R. V. Lawrence J.W.
C. W. Rideout Chaplin
J. E. McLeod Treasurer
R. R. Dunn Secretary

F. McKensie S.D.
S. H. Smith J.D.
Chas. Chesterfield S.S.
J. R. Featherstun J.S.
E. E. Noble D. of C.
R. W. Wright J. G.
H. Meade Tyler

Beaver Cup Games Friday

Youngstown curlers have challenged Chinook, the present holders of the Beaver cup, to a game which will be played on Friday evening of this week.

Two rinks will come down from Youngstown and will play with two local rinks.

The Beaver cup was won last season by the Chinook curling club against the best that could be found in any other town between Kindersley and Hanna.

A Famous Sea Captain

Late Commander of the "Empress of France."

The Canadian Pacific recently lost by death in England one of their popular sea captains who was Captain Ebenezer Cook, R.N.R., late commander of the Canadian Pacific liner "Empress of France" passed away at his residence in Great Crosby.

After conveying Mr. A. J. Balfoer and other prominent Peace Conference delegates across the Atlantic, Captain Cook was taken ill on arrival at Quebec. He was lying ill on the steamer on her return voyage, and when the steamer reached Liverpool he was removed by ambulance to his home, but too late to recover.

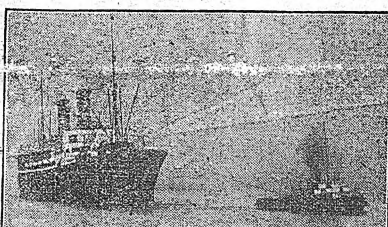

The late Captain Cook, who was 63 years of age, was a man of fine appearance, and possessed a most courteous and genial disposition. He was looked upon as one of the most capable commanders sailing from the Mersey, and he performed excellent service during the war years.

Captain Cook was born at Tayport, and joined the Allen Line in 1893 as fourth officer of the "Carthaginian." Within four years he was

Late Captain Cook.

The high esteem in which the late Commander Ebenezer Cook was held manifested itself at the funeral which was attended by a large throng of mourners, colleagues and friends. The funeral service was held at St. Luke's Presbyterian Church, Great Crosby, the service being conducted by the Rev. J. Vaughan, M.A., Vicar of Great Crosby. Captain Cook was a prominent member of the Masonic Brotherhood.

"Empress of France" arriving at Quebec, on which Captain Cook made his last trip to Canada.

promoted to chief officer of the "Tunisian," and he became the Commander of the "Oranien" in 1907. On the commencement of the war the Admiralty placed him in command of the "Victorian," and later he was given the command of the "Albatross," at that time flagship of the 10th Cruiser Squadron of the North Atlantic.

Following the Armistice, the Canadian Pacific Company retained him as commander of the "Albatross," which liner, following her conversion from war service, was renamed the "Empress of France." Captain Cook has since sailed regularly on this liner, and he was very highly esteemed by ocean travellers, including much distinguished passengers on the "Empress of France" as the Duke and Duchess of Devonshire, Lord Bryg (Governor-General of Canada), and the Rt. Hon. Mr. A. J. Balfoer.

The above property will be offered for sale subject to a sealed reserved bid and free from all encumbrances, save taxes for the year 1922.

The vendor is informed that the above property is situated about 13 miles South West from the Village of Chinook on the G.N.R. and includes a frame shingle roofed stable 14 feet by 24 feet and is fenced with barbed wire and that about 150 acres have been brought under cultivation of which about 40 acres were in crop in 1921.

For further particulars and conditions of sale, apply to I. E. Ormond, Solicitor, Chinook, Alberta.

DATED at Calgary in the Province of Alberta, this 23rd day of December A.D. 1921.

Approved W. Forbes, Registrar.

Miss Ethel Young and Miss Margaret Bayley of Laughlin spent the week end with Mrs. R. Stewart.

Youngstown Plays Hockey Here Friday

On Friday (tomorrow) afternoon the senior hockey team of Youngstown will play the Chinook stars on the local ice. A fast game is anticipated and all local rooters are expected to be present and encourage the Chinook players to keep the "bacon" home.

Blaze at Lanfne Elevator

Fire broke out in the office of the National elevator at Lanfne last Thursday and completely demolished the building.

The elevator which stands only a short distance from the office was saved.

Fortunately there was very little wind blowing at the time and the fire fighters were able to keep the flames from reaching the elevator.

2 Enterprising Business Men

The stock of the Banner Hardware store is as complete and modern as is usually found in a small city.

Messrs. Lee and Dunn deserve the unstated support of all who admire a well kept hardware store where all requirements in that line are attended to with courtesy and despatch.

Miss Blanche Deman, who has been spending the Christmas holidays with her parents, returned to Calgary on Tuesday.

After having spent the Christmas holidays here Miss Bessie Mitchell, on Tuesday, returned to Edmonton where she will continue her studies at the university.

Chinook Trims Cereal

The Trail Rangers of Cereal met the Trail Rangers of Chinook on the ice here on Monday afternoon in a fast game of hockey when ten goals were marked up for the Chinook boys while the visitors merely broke the "duck's egg."

The game started at 4 p. m. The ice was in fair condition. The game was fast right from the start and continued this way all through. In the first period, Bobby Hammon, for Chinook, scored the first two goals, then Cereal players got the puck in their opponents' net and when time was called the score stood two goals for Chinook and one for Cereal.

In the second period Bobby Hammon again scored for the home team as did also George Lensgraf.

Clinton Stata did splendid work in the third and last period and scored five goals for Chinook but Cereal failed to score a goal in the second or third periods, and the game ended with the score 10 to 1 in favor of the home team.

A game is being arranged to be played at Cereal on some date to be arranged later.

NEW RAILROAD SOON

Work on Acadia Valley Branch of C. N. R. Is Progressing

The progress of the new C. N. railroad, running from Acadia Valley west, which has been under construction for the last two years, is being watched with considerable interest—not only by the farmers located near the proposed route but by business men who are keenly watching the development of the prairies.

The grading on this road is now completed as far west as range five, and it is reported that an elevator site has been purchased at one of the townships south of Lanfne.

It is highly probable that the government will do considerable work on this road this year as there have been several petitions sent in by the municipal districts through which this railroad will pass.

If the construction work were continued it would be the means of providing work for the unemployed as well as helping to develop a large tract of country which is at present very much handicapped by the lack of railroad facilities.

Chinook business men and others are always interested in any and all moves which promise better things for the farmers, and local citizens will welcome the building of the line south. The prosperity of other localities in this district will help to increase local prosperity and make us all happy.

Better Goods at Lower Prices

Very rare indeed is a town where its general merchandise business is controlled by a man so young as Mr. J. M. Montgomery, the Chinook merchant. He is to be congratulated for the careful and complete way in which he caters to the general business of this extensive district. He is young but capable.

Just now a price-reducing sale is being conducted at Mr. Montgomery's store. He says that he is out to smash the mail order house prices in addition to giving his customers better quality goods.

Dance on Friday Evening

A dance will be held in the Arms' hall on Friday (tomorrow) night when one of the most enjoyable events of the season is promised.

Mr. and Mrs. Yake left on Wednesday morning for Edmonton.

J. A. McColl, of Youngstown, was a visitor in Chinook the early part of this week.

Mrs. Harry Meade leaves today for Calgary where she will visit for a short while with friends.

R. R. Man Says It Kept Him On The Job--Was Nearly Down And Out

"It's all due to Tanlac that I am able to be on the job today, for I was just about down and out when I began taking it," said Harold Blanchard, a trainman on the Canadian National Railway, residing at 330 Donald St., Winnipeg, Man.

"On returning from France, after three years service over there, I was so run down and weak I could hardly work. My appetite was gone and my stomach in such a bad condition that what little I did eat seemed to do me harm instead of good. After eating I would bleed terribly and my heart would beat like a hammer against my chest. The palpitation was so bad at times I began to think I had something serious the matter

with my heart. My kidneys had also bothered me for several years and there was a severe pain in the small of my back.

"My sleep at night did me little good, for I would wake up at all hours and then get up feeling as tired as if I had gone to bed all night. In fact, I felt miserable all the time. One day I happened to hear a man telling how much Tanlac had helped him, so I began taking it and the results have been nothing less than remarkable. To put it all in a nutshell, I am now as strong and well as I ever was in my life and I consider Tanlac well worth recommending to everybody."

Tanlac is sold by leading druggists everywhere.

Canada's Needs

No. 1—Population

In this, the first of a series of articles dealing with some of Canada's outstanding needs as it enters the new year, first attention is given to the subject of population, because, after all, the provision of many other needs and the solution of most national problems hinges upon the question of people.

Some people may challenge the statement that population is Canada's most pressing need. Pointing out that there is much unemployment at the present time, some may argue that we already have more people than we can adequately provide for, and that all efforts at immigration should cease. Others may contend that more important than population is the righting of certain social wrongs and the raising of the moral and religious life of the nation.

There is, of course, room for argument, but the writer would submit that before any country can amount to anything, and before there can be increased employment and a high standard in life, there must be an adequate population to make these things possible. Churches, banks, factories, railways, and so forth, do not make a country. It is people who make a nation. Without population any land will remain a wilderness, but with people, and only with people, and through people can a barren land be made anything else but barren.

Along with the New Year, Canada gets a new national administration. Among the big problems which will confront the new Prime Minister, his cabinet and the new Parliament, not one exceeds in magnitude and importance the question of largely augmenting the population of the Dominion by the introduction of the right class of immigrants.

Fortunately, the whole country is beginning to realize this fact, and east and west a growing public demand is being voiced for the adoption of a wise but vigorous and persistent immigration policy. The immigration portfolio in the new Government calls for the biggest, brainiest, most aggressive man that Mackenzie King can call to his cabinet. Confronting such a minister is a hard one, but the man who tackles it in earnest and keeps at it will not only make a lasting name for himself, but will confer benefits on Canada which cannot be reckoned in dollars and cents alone.

The new Government is pledged to adopt policies and enact laws designed to bring about a return of prosperity to this Dominion, to keep our factories busy and, generally, to provide ample employment for all citizens. The basic stone in the construction of this national edifice of prosperity is population—people settled on the vacant lands of Canada, people to work in the development of our vast wealth of raw natural resources, people who will create traffic for our national railways, people who will help to divide the load of taxation and thus make it easier for all.

There are hundreds of thousands of prospective emigrants in the countries of Europe. If number alone was all that counted the task of the new Minister of Immigration would be easy. But while Canada wants quantity, and can absorb tens of thousands of new settlers, they must be of the right type, men and women and children who will prove an asset and not a liability to Canada. Unfits, whether physically, mentally or morally, are not wanted and must be debarred, but the clean, sound, able-bodied should be picked out and encouraged to come, and mere lack of money should not be imposed as a bar to their admittance.

Canada is a land of opportunity. While the days of free homestead lands, which attracted a great influx of settlers in the first decade of the century, are no longer available, there are tens of millions of vacant acres of good agricultural land awaiting settlement. It will be the task of statesmanship and true nation-building to work out a sound policy whereby these lands are made available to settlers on reasonable terms and some assistance given to such settlers to enable them to establish homes with an assurance of success.

The first step towards evolving a practical and successful settlement policy is to discover why it is that so many thousands of people who have come to Canada in the past with the full determination to remain here and make permanent homes for themselves and their children, have, after the lapse of a few years, left the country. There is a weakness, a fault, somewhere. It should be clearly located and steps taken without loss of time to remedy the defect, whatever it may be. That done, then vigorous action should follow to encourage the hardworking, fit people of Europe to come to Canada, establish homes here, assist in the development of our stores of natural wealth, and become good citizens and active participants in the building up of this Dominion.

Hunters and Dogs

Attacked By Eagle

Wings Measured More Than Seven Feet From Tip to Tip

Great royal eagle, coming from the

Tyrol Alps, probably owing to lack of food there, have apparently recently in the canton of Grisons and fiercely attacked chamois and also hunters and dogs.

A great royal between an eagle and a setter dog took place in the mountains above Thusis. Two hunters eventually shot the bird, whose wings measured more than seven feet from tip to tip.

Eagles have killed several chamois, goats and lambs, and carried them off to their nests on the mountain tops.

A Nice Job Posters (calling on newspaper editor)—"Who was that polite little office boy who showed me in?" Editor—"Oh, that's the page devoted to women."

Palm trees supply food, timber, fuel, rope and sometimes material for clothing.

Minard's Liniment For Distemper

General Smuts' Advice

Nations Will Prosper If People "Keep Their Heads"

As General Smuts said, our present troubles will leave us stronger later on. It is better to fight through now, even at some sacrifice, than to put them off and have to deal with bigger ones in the future. Germany is adopting a seemingly easier course. She is producing a temporary and illusory activity by depicting her currency and trying to live upon paper money. Every Imperial expert is convinced that she is merely postponing the evil day, and that a gigantic crash is inevitable. The mirage of inflation never lasts long. Suddenly it vanishes and reveals the desert. "Keep your heads," says General Smuts to bankers and traders and the people generally. It is the only sound and sane thing to do. We cannot change world conditions and make all the nations prosperous in a moment. But we can at least refrain from making our own position worse by needless interruptions of activity and panicky measures.—The Johannesburg Times.

On The Marriage Day

Romance usually ceased, and history begins, and sore corners begin to go when "Putnam's" is applied. It takes out corns, roots, branches, stems—no trace of a single corn left after Putnam's Pain-Expeller Extract has done its work, 25c at all dealers. Refuse a substitute.

The Aftermath of War

Nations Have Common Enemy to Fight Against

In a great war the nations involved fight first against one another. But, after the war is over, they have another war to fight too. In the second war they are all on one side; the enemy is common to all. Whether they now squabble or agree among themselves, whether they keep up their previous groupings, or all fall apart, or all help one another in some sort of tacit confederation, they all must have it out with this second enemy. It is poverty, misery, disappointment and disillusion. France with her shattered Budget, we with our gaunt host of unemployed, Germany with her almost worthless mark, Belgium with her sour racial division, are all sustaining, at one or another stage of a common front, the perils of the tactics of war in her economic aspect, the great impoverishment, discouragement, and alienation.—Manchester Guardian.

Mother! Clean

Child's Bowels With California Fig Syrup

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, give a teaspoonful to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poisons, sour bile and waste out of the bowels, and you have a well, playful child again. Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

Londons' New Dock

A new deep-water dock, sixty-five acres in extent, has been constructed near the Royal Albert dock in London. This dock will have a depth of about thirty-eight feet and about 10,000 lineal feet of quays, with large sheds and railway lines. There will also be available after opening a new dry dock 750 feet long, 100 feet wide and 63 feet deep on the blocks.

Cheapest of all Oils.—Considering the qualities of Dr. Thomas' Electric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

The minister who made the following announcement seems to have been prepared for untoward results from his preaching.

"There are some flowers here," he said, "for those who are sick at the close of this service."

Many New Factories in Winnipeg Within the past year 71 different enterprises were started in Winnipeg, aggregating an investment of \$1,600,000. Among them were factories for the manufacture of linen, garden implement, cabinets, electric appliances, lamps, chemical products, radiators, wood carving, brooms, cigars and caps.

No surgical operation is necessary in removing corns if Holloway's Corn Remover be used.

"What are you doing" of, James? "Sharpenin' a bit of pencil." "You'll 'ave the union after you me lad. That's a carpenter's job."

A Dying Island

Scientists Believe Land Soured From Rapid Vegetation

A good sized island in Puget Sound is apparently dying of old age.

It was recently observed, says a correspondent, that every fir and cedar tree on the island was dead. About the water's edge vegetation appeared withered, and a thin vapour hung over the island during the day. Now the Watery Block, about 100 acres in extent, the island has for years been noted for its growths of wonderful trees. Fir three feet in diameter grew so thickly as to make travel through them almost impossible. Both cedar and alder flourished.

The ownership of this tract has been in litigation for some years, and the timber could not be logged.

Now there is not a living thing on the island. Death stalks grimly over the trails worn by formed denizens of this forest empire. Not a crow crows on the dead tops, and as boats pass an occasional crash tells of the falling of a great tree.

Scientists who recently visited the island believe the land soured. The growth of the trees and vegetation has been so rapid and dense as to exhaust the humus in the soil.

Another theory is that the soil rests on a rock base, and the roots of the plants have come into contact with the brine of Puget Sound to such an extent that the salt has burned out the plant life. The vapour is caused by decaying vegetation.

Birds keep away, as insects are few in dead timber.

WHY BEAUTY FADES

A Condition Due Entirely to Poor

The girl who returns home from school or from work thoroughly tired out will be fortunate if she escapes a physical breakdown, because the going tired so easily is probably the first, warning symptom of a thinning scalp. The hair must be discarded if her health is to be preserved.

When the blood becomes thin and impure the patient becomes pale, languid and angular. She not only tires out easily but suffers from headaches, palpitation of the heart, dizzy spells and a loss of appetite. This condition will go from bad to worse, if prompt steps are not taken to increase the blood. The blood is the life of the body. It makes the rich, red blood that brings the glow of health, no other medicine can equal Dr. Williams' Pink Pills. It builds up the system, gives the rosy cheeks, bright eyes, a good appetite and good spirits. Dr. Williams' Pink Pills will build up the system, give the rosy cheeks, bright eyes, a good appetite and good spirits. Dr. Williams' Pink Pills will build up the system, give the rosy cheeks, bright eyes, a good appetite and good spirits.

Dr. Williams' Pink Pills can be obtained from any dealer in medicine or by mail for \$5.00. Write to Dr. Williams' Medicine Co., Brockville, Ont.

Coal Or Water?

A new French estimate of the world's water power resources credits the United States with 30,000,000 available horsepower; Canada with 25,000,000; Norway with 7,500,000; Sweden with 6,750,000; Australia with 6,000,000; Italy and Spain with about 6,000,000 each; Germany with only 1,500,000; and England with 1,000,000, have a supposed compensating advantage in their supplies of coal.

TAKE NOTICE

We publish simple straight testimonials from well known people, not biased agents' interviews.

From all over America they testify to the merits of MINARD'S LINIMENT, the best of Household Remedies.

MINARD'S LINIMENT CO., LTD.

Farmington, N.S.

Brandy Factory, St. John's, Nfld.

Buried in His Working Clothes

During his lifetime W. Lindridge, butcher of Charing, Kent, expressed the desire to be buried in the clothes in which he went to market. He has just died, aged 65, and was buried fully clothed, even in his boots. The coffin was borne into the church by a butcher's motor car which Mr. Lindridge had used in his business.

Cascarets Tonight

For Liver, Bowels, If Bilious, Headachy

Get a 10-cent box now. "You're headachy? You have a bad taste in your mouth, your eyes burn, your skin is yellow, your lips parched. No wonder you feel mean. Your system is full of bile not properly passed off, and what you need is a cleansing up inside. Don't continue being a bilious nuisance to yourself, and those who love you, and don't resort to harsh physics that irritate and injure. Remember that most of the disorders of the liver and bowels are gone by morning with gentle, thorough Cascarets—they work while you sleep. A 10-cent box will keep your liver and bowels clean; stomach sweet, and your head clear for months."

Cascarets too children love to take. Cascarets too children love to take. Cascarets too children love to take. Cascarets too children love to take. Cascarets too children love to take.

British Columbia Developments

Canadian National Railway Official

Speaks of Possibility of Outlook. Osborne Scott, general passenger agent, Canadian National Railways, Vancouver, who was in Winnipeg recently attending a conference of officials of western lines with C. A. Hayes, vice-president in charge of traffic, and H. H. Melanson, passenger traffic manager, Toronto, writes with respect to future business activities.

Speaking of progressive developments in his territory, Mr. Scott was in an entirely optimistic mood. He spoke of steadily increasing land settlement in the valleys and on the plateaus of Central British Columbia traversed by the Grand Trunk Pacific and also in the valleys of the Thompson and Fraser Rivers. Considerable land is already under cultivation in the more recently settled sections and production has reached a shipping stage. The fruit output in the southern part of the province is, of course, the outstanding feature of land production. By the introduction of improved varieties and exercising constant vigilance in combating pests, the old prejudices harbored against British Columbia apples have been dissipated and now our apples are being marketed successfully in Great Britain, United States, Japan, New Zealand and Australia, and also in Eastern Canada, which is world famous for the quality of the staple fruit.

The export of pure bred dairy cattle from British Columbia to Antipodean countries and to Japan is another interesting feature of our agricultural progress during the past two years. Pure shipments were found so satisfactory that large repeat orders are now coming. The dairying industry is also expanding fast, the long season of outdoor grazing being a big advantage.

Lumber is the chief export of the province today, our splendid timber products finding ready markets in all parts of the globe, but other products, both raw and manufactured, are claiming attention of overseas consumers to such an extent that a company, known as the Canadian Producers Corporation Limited, has been organized with an authorized capital of \$1,000,000 for the purpose of purchasing and exporting the output of British Columbia forests, fisheries, factories and mines to all parts of the world. This company has trade connections in both the Orient and Occident. In connection with growing export business, Canadians should feel special pride in knowing that the ships of the Merchant Marine are playing a very important part in carrying out goods to the world's markets. The flag of our merchant fleet is now found on the seven seas of the globe, and wherever it goes Canadian trade goes too. With respect to the lumber business, Mr. Scott states that exports this year in August 51st, amounted to 101,604,256 feet.

As all year round resort of tourists, holiday makers and seekers after health, British Columbia is growing in favor, Mr. Scott declares, and community and other organizations are providing facilities for the accommodation and entertainment of the many visitors. Vancouver is providing a new attraction for that city in the way of an immense pavilion for winter salt water bathing and water sports. It will be located on English Bay and the water will be heated to the proper temperature. Visitors from the prairie provinces, whose numbers increase each succeeding season, have their own social organizations and have enjoyable gatherings and recreational amusements.

The Wise Spider Knows That Wet Weather Makes Ensnaring Threads Useless. The spider is an excellent weather prophet. Henri Fabre, the wonderful old man who found out so many of the secrets of insects and their kind, told of the threads of the spider's web used for catching its prey are made useless by too much dampness. These threads, so tiny as to be almost invisible, are really hollow tubes filled with sticky fluid which oozes through the walls and chills whatever touches the thread. This fluid readily absorbs the moisture from the air, and would soon lose its sticky nature in the rain or ice. So the wise spider, loath to waste precious material, waits until the wet weather is virtually over before weaving the ensnaring threads. How it knows what the weather is to be is still one of the mysteries.

A tank heater that can burn wood, rubbish or soft coal is a boon to farmers, see offer made by the Metal Shingle and Siding Co., Ltd., Winnipeg. Their ad appearing elsewhere in this issue.

Approximately 500,000 pies are eaten daily in ten of the largest cities in the United States.

Minard's Liniment For Colds, Etc.

WEAK HEART

NERVES BADLY SHATTERED

Many a woman who should be strong has let the fat of life and energy is bound by the shackles of ill-health. Some disease or constitutional disturbance has left its mark in the form of a weak heart, shattered nerves, impoverished blood and an exhausted condition of the whole system.

MILBURN'S

HEART AND NERVE PILLS

they will find a remedy that will supply food for the exhausted nerves, one that will strengthen and regulate the weak heart and invigorate the whole system.

Mrs. W. W. Pearce, 14 Seaton St., Toronto, Ont., writes—"I was left with a weak heart, a run-down condition from the 'flu.' My nerves were badly shattered, and I had such pains around my heart I could not sleep much at night. I took several doctors' medicines without getting any better. My husband got me to try Milburn's Heart and Nerve Pills, and after I took one box I got relief, and after taking six boxes I have been well and not bothered with my heart since."

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Record Wheat Shipment

Over Two Million Bushels Handled On Great Lakes In 1921

Closing of the navigation season on the Great Lakes reveals the fact that for the season of 1921 a total of 108,017,810 bushels of wheat have been shipped since navigation opened; by far the largest quantity ever shipped in the history of upper lake navigation.

Thanks For The Suggestion

A countryman went to London to visit some relatives and to see the sights. He remained until patience upon the part of his hosts, a married couple, had ceased to be a virtue. "Don't you think, my dear fellow," remarked the husband one day, "that you and your children must stay here?" "No doubt, thanks for the suggestion; I'll send for them."

Simple and Sure.—Dr. Thomas' Electric Oil is so simple in application that a child can use it with perfect instructions. Used as a liniment the only direction is to rub and when used as a dressing to apply. It is so simple and sure that they are readily understood by young or old.

Be fair to your local merchants. Ask to see his goods and compare prices before sending your money to the mail order houses. You will find that it pays.

Sleeping Sickness Cure

Professor Newstead, of Liverpool University, says German scientists have discovered a new drug which has proved invaluable in the cure of sleeping sickness.

Some people have so much and others just nothing at all.

ARE YOU A MOTHER?

Mrs. Dalton writes: "I have used Dr. Pierce's Favorite Prescription for my children. It is safe for Young Mothers to take as a Tonic and Nervine because it contains no harmful ingredients."

London, Ont.—"Dr. Pierce's Favorite Prescription has been my life's support and for that reason I am most enthusiastic in my recommendation of it to women who are ailing and weak. I was taken with the measles when I was an expectant mother and my child was born blood-poisoned and in my family became a great sufferer. I was advised to give me Dr. Pierce's Favorite Prescription and I took several bottles of it and was restored to my natural strength. I cannot praise Dr. Pierce's medicine too highly and will be willing to write to any lady who sends me a card."

Mrs. H. H. Bishop, R. R. No. 1, "You'll soon feel better if you obtain this 'Prescription' of Dr. Pierce's at your nearest drug store, in tablets or liquid, or send 10c to Dr. Pierce's Laboratory in Bridgeport, Conn., for a 25c bottle and write for free medical advice."

HEALTH BRINGS BEAUTY

Yvonne Hild is Vice to Yvonne. "Barrie, Ont.—'I was suffering from a run-down system some time ago, was unfit to perform my daily duties, and was advised to try Dr. Pierce's Favorite Prescription. I tried it, took two bottles, and was restored to my natural strength. I cannot praise Dr. Pierce's medicine too highly and will be willing to write to any lady who sends me a card.'"

Mrs. H. H. Bishop, R. R. No. 1, "You'll soon feel better if you obtain this 'Prescription' of Dr. Pierce's at your nearest drug store, in tablets or liquid, or send 10c to Dr. Pierce's Laboratory in Bridgeport, Conn., for a 25c bottle and write for free medical advice."

France Remains Firm On Broad Plans For Submarine Building

Washington.—Efforts to limit the naval strength of the powers in submarines and auxiliary warships came to an abrupt end after they had drawn the French and British arms conference delegates into a plain spoken exchange over the possibilities of a future war between France and the British empire.

The French, acting under renewed instructions from their Government, told the conference naval committee, with an air of finality, that France must remain free to build a submarine fleet nearly three times as great as that she now possesses and to construct, in addition, destroyers, destroyers and other auxiliary craft up to a tonnage of 330,000 tons.

To the proposal the Japanese, Italian and United States delegates replied with expressions of surprise and regret, while the British charged openly that such a building programme must be regarded as a menace to British shores. Right Hon. Arthur J. Balfour added that he had no doubt, if occasion arose, Great Britain would be equal to it, but only if she reserved complete freedom of action as to the construction of all types of auxiliary vessels which might be useful against underwater warfare.

Agreeing that further argument would be useless, the committee turned its attention to collateral subjects, including regulations for future use of submarines, proposals for limitation of the size and armament of individual auxiliary vessels and details of the agreement already sealed in principle regarding capital ships.

Improve Conditions On the Farm

Nothing More Worthy of Men of Science and Education, Clifford Sifton Says

Toronto.—Addressing a session of the American Association for the Advancement of Science, Sir Clifford Sifton emphasized particularly the necessity for improving conditions of life on the farm. So important did the former minister of the interior consider this that he declared:

"Nothing is more worthy of the attention of the nation of science and education than the amelioration of the conditions of the average farmer and his family by inventions and appliances which will facilitate as far as possible the performance of the ordinary work of the farm, and which will improve the productivity of the soil."

"Without going into further details I would put as the very first requirement in the development of natural resources, recognition of the fact that the most important resource is agriculture and the improvement of conditions upon the farm to go back to the exodus from the farm may be stopped and farming operations rendered more easy and comfortable," continued Sir Clifford Sifton, amid applause.

"I am quite certain that the movement from the farm to the city is largely due to the fact that the farmer's wife and family against the slavish labor which they have to do and this revolt in my judgment is amply justified by the conditions. When it is said that the interests of the country require the promotion of a movement to get people to go back to the farm the answer is that what is wanted is not propaganda but something that will render life upon the farm more tolerable."

"It is not for nothing that the farmer has gone into politics. The basic industry of this country is crying out for help and the help that is required is not subsidies and not spoon-feeding, but action which will place the work of the farm upon a better and more comfortable, and more remunerative basis. The successful carrying on of the farms of Canada depends on the domestic work in the farmer's kitchen and barnyard."

May Oppose Harding's Shipping Plan
Washington.—President Harding's shipping plan, though not fully worked out, will be ready to offer to Congress soon after the holidays. It will provide for a heavy expenditure in direct subsidies. Intense opposition to it is already developing in Congress and it is generally regarded as doubtful whether it can be forced through even under administration pressure. Agricultural interests are lining up against it.

By making your purchases from your home merchant you are contributing direct to the prosperity of the community in which you live.

V. N. U. 1401

A Scene of Splendor

Calcutta.—Amid scenes of splendor and the presence of enthusiastic crowds the Prince of Wales opened the Victorian Memorial, dedicated to the Queen-Empress Victoria, whose memory is held in the highest esteem throughout India. The building is in the form of a vast marble palace and is of rare architectural beauty. It required 15 years to erect it. The building comprises a museum, commemorated to India's glory. It contains portraits of the old emperors of Delhi and of famous men who labored for India during the Victorian era. The ceremony was carried out in full state.

Rush For Gold Claims

Activity Greatest Since the Opening Up of Northern Manitoba as Mineral Belt

The Pas, Man.—Show staking of mining claims in the new Elbow Lake gold camp, north of here, is the most active since the opening up of Northern Manitoba as a mineral belt. The action of the Hollinger mine of Porcupine in taking an option on the Murray Brothers' claims has caused every prospector in the district to head for the new camp. Sales of claims are numerous, and the price has advanced from \$500 to \$1,000. One small group of claims, seven miles from the Hollinger properties has been sold by a local man for \$5,000 cash, and a banker here was handed \$2,700 for one claim and the sale of another for \$3,000 quite a distance from the Murray claims. Most of this money comes from Montreal and Toronto interests.

A Heavy Sentence

Galician Gets Forty Years for Smashing Windows

Parry Sound, Ont.—Hungry and cold and out of job, Stephen Zowisulski, a Galician, decided to smash a few windows in order to earn a term in a prison for the winter. That was the explanation to the court of his assault on store fronts with an iron bar in the early hours of last Wednesday morning when 21 plate glass pane fell before his wily weapon.

Police Magistrate Geo. Moore sentenced Zowisulski to four years in the penitentiary on each of ten charges, the sentences to run consecutively, making a total of forty years. Magistrate Moore said he would make the sentence a stiff one in order to warn other seekers for winter quarters to go easy on the destruction of property.

Consult Premier on Liquor Legislation
Edmonton.—Conferences with Hon. Mackenzie King on liquor legislation looking toward closer working arrangements between the Dominion and provinces on matters which vitally affect both; with the attorney-general of Ontario; with respect to bringing about uniformity in company legislation and with Premier Norris, Manitoba, on questions which affect the two provinces, constitute the programme which the attorney-general, Hon. J. H. Brownlie, has set himself for the next three weeks.

Veteran Arrested in Ottawa
Ottawa.—Wm. H. Coulter, the veteran who walked all the way from Vancouver to Ottawa to lay some grievances as to his treatment while overseas before the Government, appeared in police court charged with disorderly conduct on the public streets. Magistrate Askwild permitted him to depart on suspended sentence.

Plan Help For Russia
Rome.—The Italian Red Cross is to establish eighteen food and medical depots in the famine area of Southern Russia, under an agreement signed here by the president of the organization, and M. Vorovsky, Soviet representative. The government has contributed 6,000,000 lire for the work.

Seize Liquor Shipment
Toronto.—Magistrate Denison's order for the confiscation of a carload of liquor which had been shipped from Montreal to Toronto as lath, was upheld in a judgment in the first appellate court.

Guard Public Morale
Chicago.—The movies jazz dancing and the cigarette, as they affect public morals, were denounced at a recent session of the International Purity Conference.

Cannibalism In Russia

Russians Eat Dead Bodies in Famine Stricken Areas

Riga.—The first official report of cannibalism in the famine districts of Russia has been made to the all-Russian Soviet congress by Delegate Orvlenko, of Samara, according to a dispatch to the official Rosta News Agency, dated Moscow.

"At Raminovskaya the parish people are eating the bodies of their dead," Orvlenko told the congress.

"It is dangerous to bury the famine victims in the presence of the people and guards must be kept over them until they are in a state that makes eating impossible."

The speaker said that children are being taken to the Steppes and left there to die; that mothers, maddened by their experiences, cut the throats of their babies.

At the beginning of January, continued Orvlenko, the Soviets, with all their outside aid, will be able to feed only half the starving children and only one-twentieth of the adults. The rest of the people would have to die while waiting help.

Sugar Drops In New York

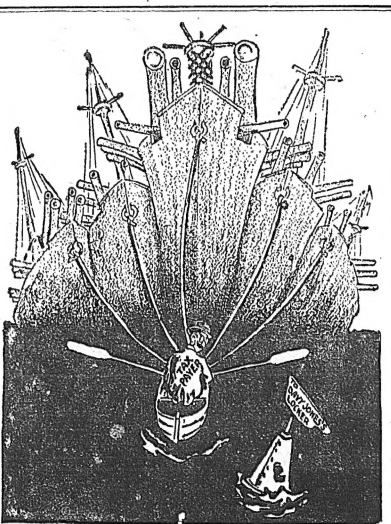

New York.—Raw sugar has plunged to the lowest level in 15 years and within a quarter of a cent of the lowest ever reported. The price for Cuban, cost and freight, was 1 3/4 a pound on Dec. 28. Refined sugar shared the break in raws and was quoted at 4.90 cents a pound for fine granulated. This was the first time in many years that it sold for less than five cents.

C.P.R. Conductor has Envious Record
Winnipeg.—William Fogg, senior conductor of the Canadian Pacific Railway, with 43 years' experience as a railroad, 36 of them served as a conductor, has been superannuated. He bears the enviable record of never having lost a passenger.

Mr. Fogg was forced to retire before making his final trip as a result of an accident at Port William last week. He would have concluded his railroad career December 31.

For Toys and Games

New York.—More than \$100,000,000 was spent by the people of the United States for toys and games during 1921. The National City Bank has figured. The factory value of toys manufactured in this country has more than trebled, it was estimated, since the war cut off the supply from Germany.

—Louisville Courier-Journal
HIS FIRST JOY RIDE

Discuss Farm Problems

Prof. Bracken Also Pays Tribute to Early Investigators of the Country
Winnipeg.—Agricultural experts from many parts of the Dominion and the United States gathered here for the second annual convention of the Western Canadian Society of Agronomy.

Addressing the delegates, Prof. John Bracken, president of the Manitoba Agricultural College, paid a tribute to the men who had led the way in the matter of research and experiment. When the history of agriculture in Western Canada was written, he said, the early investigators in agronomy would be complimented on the standard of soil treatment and crop production. On the other hand, they might be criticized for not having conserved the soil in the way that might be expected, and it was the fact that they had not done so that constituted the problem before us today. Methods had, to be devised for solving that problem before it was too late.

Prof. Manley Champlin, of the University of Saskatchewan, read a lengthy paper on "Field Tests with Fallow Substitutes," in which he said the University of Saskatchewan in 1922 would undertake a project to determine the effect of various fallow substitutes in the production of wheat outlined as follows:

Oats, barley and wheat in double rows, 36 inches apart, and in triple rows, 30 inches apart; corn, potatoes and sunflowers in single rows, 48 inches apart, and sudan grass in double rows, 45 inches apart.

M. J. Timline, Scott, Sask., gave a paper on "Practical Crop Rotations for the Prairie Farmer." Because of the one-crop system farmers were, as a class, financially embarrassed. Adoption of rotation on the farm would distribute labor more evenly throughout the summer and provide winter employment, he said.

Friendship Increasing Powers On Increase

Crown Prince of Japan is Pleased With Results of Conference

Tokio.—Crown Prince Hirohito, the regent, personally reading the speech from the throne at the opening of the Diet, expressed gratification in noting the increasing friendship of the Japanese Government with the different treaty powers, and that the Washington conference was approaching a successful conclusion.

The regent exhorted the co-operation of the Japanese people in the promotion of national prosperity and of lasting peace in view of the added responsibility of the nation with respect to other nations. The session of the Diet was brief and formal.

Campaign to Check Reckless Driving
Hamilton, Ont.—That next spring the department of public works would start a campaign to check reckless driving and prevent irresponsible drivers from operating cars throughout the province, was the announcement of Hon. F. C. Biggs, who addressed the Kiwanis Club here.

British Golfers to Tour Canada
Chicago.—James H. Taylor, five times open golf champion of Great Britain, and Alex. Hord, who held the British title in 1907, will make a tour of Canada and the United States next summer, it was announced here. The veterans will compete in the United States open golf championship at the Skokie Club, Chicago.

Upsets Theory That Summers In Canada Are Growing Drier

The RepARATION Question

Hamburg.—The efforts of Germany during 1921 to fulfill her peace obligations have failed, and it is idle to think that any political or economic efforts will now succeed unless these conditions are modified, declared the annual report of the Hamburg chamber of commerce. "Those who still believe the London ultimatum can be carried out," says the report, "either are without judgment or do not desire fulfillment but the destruction of Germany, which in time would react on France, England and America."

France Wants Strong Fleet

Submarine is Defended As Essential Weapon of Defence and for Military Purposes Only

Paris.—France's determination to limit conference, were vigorously to the limitation efforts of the Washington conference, were vigorously voiced in the Senate during a discussion of the marine section of the government's budget.

Senator de Kerguelen defended the submarine as an essential weapon of defense, but wished it to be confined to military uses instead of being applied to torpedoing commerce. "At the Washington conference," he said, "we were surprised to see the French delegation demand 320,000 tons of capital ships when France does not intend to carry war into foreign waters. France desires no imperialism, but if we found Admiral de Bon's proposal strange, there are, nevertheless, limitations which we cannot accept."

Use Unemployed As Night Guards

Plan Suggested for Philadelphia May Check Thefts

Philadelphia.—A plan to use 4,000 unemployed in the city as night watchmen, their wages to be paid by the contribution of 15 cents weekly by each family in the territory they were to guard, has been suggested to the Unemployment Committee by Major J. Hampton Moore. The plan, it was said, has the endorsement of police department officials.

The watchmen would not be in uniform and this fact, the Major said, would have the effect of decreasing automobile thefts, burglaries and banditry of all sorts.

Situation In Egypt Improving

London.—Official reports received from Cairo stated that the situation in Lower Egypt was approaching normal, that all officials had returned to their offices and that only the schools remained closed.

There were small disturbances in Alexandria, but Cairo, the canal zone and the hinterland were quiet, indicating, according to official circles here, that the worst of the disturbances have ended.

Wary of Winter, Suspect Surrenders

Winnipeg.—Wary of the vigorous northern climate and expressing a deep longing to be back under southern skies, William B. Shelley, wanted for theft at Oakland, Cal., walked into the police station here and gave himself up. He was remanded for one week in order that the Oakland police may be communicated with.

Toronto.—Many weather idols of the mere layman were smashed when S. C. Lee, of the Manitoba Agricultural College, produced before the science council a great array of charts which proved beyond all peradventure that there was no foundation for the homebreasted complaint that the summers were growing drier and drier. Parched crops were merely seasonal phenomena. The figures showed that they were not more common than formerly and also that they did not recur in regular cycles of dry or wet seasons.

The broader aspects of this same question were presented by A. J. Comer, of the Dominion meteorological office, who dilated upon the extent to which rainfall in the west was dependent upon the convergence of air currents from the Arctic, Pacific and Gulf regions which, after sweeping across the continent, usually converged in Manitoba or Eastern Saskatchewan.

When the association convened numerous interesting and highly technical papers were read at the various branches.

According to W. A. Johnston of the Geological Survey, Ottawa, the famous Lake Louise, so well known to tourists of Western Canada, will eventually disappear. Deposits are gradually filling up the lake, but the process of deposition is so slow that it will take a thousand years or more to fill the lake basin.

Addressing the association of official seed analysts, President George H. Clark, Dominion seed commissioner, said:

"Looking into the future, there can be no doubt that the service of seed-men will be needed and, in fact, will become indispensable. Our experience in Canada has been that when a system is provided by which farmers may easily be able to identify seed of the quality they desire, they will pay a fair price for it." He added that it was important that a unified and practical system of seed grading should be adopted throughout North America.

Famous British Actor Dead

Sir John Hare Was Widely Known to Canadian Playgoers

London.—The death of Sir John Hare, noted English actor and manager, is announced here. He was 77 years old.

Sir John Hare was widely known to Canadian playgoers as one of the eminent figures of the English stage. He appeared in the Dominion on several occasions in a number of plays in his extensive repertoire, notably "The Merry Wives of Windsor" and "The Gay Lord Quex."

Sir John was born at Giggleswick, York, in 1844. His parents wished him to enter the civil service and he was educated with that object in view. The stage appealed to him, however, and he studied for a theatrical career. His first appearance was in Liverpool in September, 1864. His first London appearance was made the following year as a member of the Prince of Wales Company.

Clyde Business Drops

London.—Clyde shipbuilding returns for this year show that 314 vessels were launched, with an aggregate tonnage of 514,000 tons. This is a big drop from last year's tonnage of 693,000. The largest vessel launched in 1921 was the Windsor Castle, of 19,000 tons.

British Government Has Gone The Limit On Irish Question

London.—A statement from Prime Minister Lloyd George was issued here to the effect that the Government has gone the utmost limit in the Irish agreement and that it was impossible to reopen the discussions.

The delay in ratification in Ireland, the statement said, was holding the statement said, was holding up the working of the cabinet committee appointed to arrange the evacuation of the British forces in Ireland, settle the terms of the amnesty and transfer executive responsibility to the Irish provisional government.

Following is the text of Lloyd George's statement: "No British statesmen could go further than we have gone; no British statesmen could consider any proposal involving Ireland being out of the empire."

"The treaty places Ireland on an equality with the other states of the empire and gives Ireland the same claim to membership in the League of Nations and every right that Canada has in law, fact, and constitutional practice; and not merely rejection, but attention even of the treaty would render it null and void. This would indeed be a deplorable loss of the interests of both countries."

"The British Government has gone their utmost limit in the treaty and to reopen the discussion which was closed only after the most exhaustive consideration of every point, would be a fruitless proceeding and is impossible."

Eastern people, as a rule, do not know what "hauling to market" means. Many western farmers, located miles from a railway, start out at dawn to draw a load of grain to an elevator. Arriving in town after dark, they have to board themselves and their team for the night at some expense. Next morning they deliver their grain to the elevator, do some necessary shopping and arrive back home after dark again—having been on the road some 36 hours. The construction of the Canadian National Railways was a tremendous boon to thousands of such farmers, by bringing shipping facilities much closer to their farms—literally cutting down the time necessary to deliver a load of grain from day to hours.

JUDICIAL SALE OF FARM PROPERTY

PURSUANT to the Judgment and Final Order for Sale there will be offered for sale by public auction, subject to the conditions and Reservations expressed in the original grant from the Crown or in existing Certificate of Title and subject to any outstanding Seed Grain Liens, particulars and amounts of which will be made known at the time of sale, with the approval of the Master in Chambers, Edmonton, by James H. Davis, at the Post Office of Chinook, in the Province of Alberta, on Saturday, the 7th day of January, A.D. 1922, at 12 o'clock noon:

The North West Quarter of Section Thirty-three (33), Township Twenty-six (26), Range Seven (7), West of the Fourth (4th) Meridian, in the Province of Alberta, of record in the Land Titles Office for the South Alberta Land Registration District. Subject to the Reservations and Conditions in the present Certificate of Title, excepting thereout the land covered by the waters of Lake A. at the time of the survey of the said Lake, as shown on a plan of survey of said township, approved and confirmed at Ottawa, 29th of August, 1916, by Edmund Doolittle, Surveyor-General of Dominion Lands, and of record in the Department of the Interior, containing One Hundred and Fifty-six and eighty-hundredths (156.80) acres more or less.

The Vendor is informed of the following particulars:

The above mentioned property consists of One Hundred and Fifty-six (156) acres more or less, located 13 miles from Chinook and 2½ miles from Big Spring Post Office. About 80 acres of this land have been under cultivation and approximately 70 acres more could be broken. The soil is a chocolate loam of an average depth of 8 inches with clay sub-soil. Located thereon is a house shingle roofed 12 by 14 feet and a frame stable and

granary 16 feet by 28 feet.

The property will be offered for sale subject to a reserve bid which has been fixed by the Master in Chambers.

Terms of payment are—The purchaser is at the time of the sale to pay down a deposit of 10% of the amount of the purchase price to the Vendor's solicitors, and the remainder of the purchase price is to be paid into Court within sixty (60) days without interest, or the purchaser shall have the option of paying 10% of the purchase price as aforesaid, and giving a mortgage to the Vendor not to exceed \$500.00, payable as follows: \$50 yearly for four years and the balance at the expiration of the fifth year with interest at 8 per cent. per annum, and to pay the balance of the purchase price then owing into Court within Sixty (60) days without interest.

In all other particulars the terms and conditions of Sale will be standing conditions of the Supreme Court of Alberta, as approved by the Master.

Further particulars can be had from Messrs. Parlee, Frooman, McKay & Howson, Barristers, etc., No. 103 C.P.R. Building, Edmonton, Alberta.

Dated at Edmonton, Alberta, this 28th day of November, A.D. 1921.

Dairy Farming In Western Canada Is Making Rapid Progress

It has been said that an agricultural country can never reach the maximum state of development until its farmers engage extensively in dairying. This principle is now universally recognized, and the countries following the best farming methods are those producing the highest per capita output of milk, butter and cheese.

Western Canada has proved many times over that she can produce the best hard wheat in the world, and now she is convincing her neighbors that she can send them butter of just as fine a quality as her grain. Her farmers are gradually being persuaded that the most economical way to market their fanners and other crops is in the form of livestock and dairy products, and practical demonstration is proving this. During the last ten years a phenomenal growth in the number of dairy cows and a wonderful improvement in the quality of dairy products has been witnessed in the Canadian West. At the present rate of progress, the permanent agriculture of these Western Provinces will, in a few years more, be devoted largely to intelligent dairy farming, with its products commanding the same respect as "No. 1 Canadian Hard Wheat" does today.

Before this can be accomplished, however, it is recognized that Western Canada must produce butter and cheese of a quality that will enable her to compete in the world's markets with such countries as Denmark, where the science of marketing dairy produce has been reduced to a fine art. To do this successfully, the basic product—cream—must not only be of a high quality, but the finished article for export must be of a uniform grade and adapted to the palates of the people in the countries where it is sent. This is the problem that is now occupying the attention of dairy experts in all three provinces, and success has attended their efforts may be judged from the fact that a ready market is found for all surplus produce, not only in the provinces of Eastern Canada but also in the United States and Europe.

It was not until 1916 that even Manitoba, although the oldest of the Prairie Provinces, commenced to produce enough butter to do any exporting. In 1919, however, that province sent out 153 carloads, and during the first few months of 1920, 17 carloads of creamery butter were shipped to Chicago, one to New York, one to Philadelphia, and two to New Scotia, besides a number of carloads to Eastern Canada and the Pacific Coast. Saskatchewan is following closely in the footsteps of her sister province, and during the first nine months of 1920, shipped 81 carloads of produce, 43 of which went to Eastern Canada and seven to points in the United States. From a production of just over two million pounds in 1910, Alberta now has an annual output of more than twelve million pounds of creamery butter, which is increasing steadily every year. A large proportion of this naturally finds its way to the export market.

In 1910, Alberta produced 2,315,000 pounds of butter, Saskatchewan, 1,518,696 pounds, and Manitoba, 2,050,487 pounds—a total of just over six million pounds. In 1920, ten years later, the production of these three provinces had increased between eight and nine hundred per cent. to 25,275,000 pounds. The total value of dairy products was more than \$74,000,000.

In spite of such progress, however, the dairy industry is only in its infancy in the Prairie Provinces, and there is much to be accomplished before these provinces can hope to reach their height of production. What has been done is but an indication of what may still be accomplished. Western Canada's most pressing need is more farmers and more stock. To these she offers a great opportunity. For the dairyman she has cheap land, growing heavy crops of grasses and feeders, a suitable climate and excellent marketing facilities, ensuring cheap production and a good price for the finished produce. What these assets and a more closely settled population, there is no reason why Western Canada should not take her place among the dairy countries of the world.—By P. J. Cowdery, Calgary, Alberta.

Preparedness

Mistake.—Your baby was very good at the christening. I don't ever remember of a child behaving so well. Mother.—I've been mistaking an "idm" for a week with the watering can.

Too many men who boast of being self-made seem to have been interrupted before the job was finished.

Earliest form of ballroom dancing was the quadrille, started about 1815.

Trappers Making Money

Expect Good Fur Trapping Season In North Country

Trapping—the big business of the north country for the next few months—is in full swing and many trappers are well established on their trap lines again. Muskrat trapping has been going along briskly and it is expected that 100,000 pelts will be marketed in the Pas. Reports state that the catch is good everywhere. Traders and buyers have been paying over a dollar for muskrat skins, while one buyer figures that a muskrat is worth more than a bushel of wheat and worth about as much as four bushels of oats.

Recently a number of fur buyers, with a sum of \$30,000 in cash between them, left Le Pas for the north to buy furs along the Hudson Bay railway. The train stops at each trading post station for only a few minutes and in this brief period the fur buyers must rush upon the trade or trapper if any are about to make an offer for their furs. This manner of trading contains the element of chance as time prohibits close examination of the pelts, and the buyers can only hastily scan them and make their offer. This method of buying has been in vogue for many years, lone buyers have been known to return here with as high as \$40,000 worth of pelts.

Famous Convict Ship Will Visit Canadian Port

Ocean Hell Transported Men, Women and Children to Australia

The only survivor of the once notorious "felon fleet," which between the years 1787-1868 transported over 167,000 men, women and children convicts from Great Britain to Australia, namely, the Success, now on a tour of the world, will touch at Montreal, making a stay of several weeks at the opening of the next navigation season, according to a letter received from her master Captain D. H. Smith. The Success was built in 1790 and was the commodore of the felon fleet, otherwise known as "The Ocean Hell." She is in no degree changed from her original state and aboard are shown the airless dungeons, the whipping posts, the branding irons, punishment balls, lead-tipped cat-o-nine tails, coffin bath and other tortures of the age. She has been inspected by over 15,000 people.

A Universal Alphabet

Would Be Of Great Benefit To All Nationalities

It has been suggested that there be called an international conference on the adoption of a universal phonetic alphabet. It is thought that the Roman alphabet should serve as the basis, but that slight modifications should be made in the form of the letters, which would not interfere with their legibility to anyone familiar with them in their present shapes. In order that there be indicated the precise sounds for which they stand. Such an alphabet, it is maintained, would enable anyone to pronounce correctly at a glance the words of a foreign language, because the spelling, apart from a few special signs, would be the same as in his own language. There is said to be no language so hindered by its spelling as the English.

Early Prisons

In ancient times prisons were private affairs used to remove rivals or enemies. The first application of the prison system in Great Britain as a punishment for crime came in the establishment of workhouses in London in 1550. Prisons started as reform institutions in 1794, when Pope Clement XI. organized the criminal ward of the Hospital of St. Michael in Rome, as a means to aid the criminal rather than punish him.

A Close Second

"I heard today that your son was an undertaker. I thought you told me that he was a physician."
"Not at all."
"I don't like to contradict, but I'm positive you did say so."
"You misunderstood me, I'm sure. I said he followed the medical profession."

Ghost Language

A man pretended to have seen a ghost, and was asked what it said to him. "I could not understand what it said," replied the man, "for it evidently spoke one of the dead languages, and I did not learn them at school."

The one great drawback about loafing is the unsatisfactory compensation.

New Machine Sells Tickets

Also Makes Change and Saves Time and Labor

A machine for the rapid issue of railway tickets was being demonstrated at Manchester, Eng. The idea is quite simple. Outside the "battery" are slots in the walls, and below each of these a saucer-shaped receptacle. The traveller puts his coin in the penny, twopenny or threepenny slot and the ticket shoots out into the receptacle. If he puts a shilling into the twopenny slot three tickets emerge. If he puts a shilling into the fivepenny slot he will get his ticket and a penny change. He need not have two pennies for the twopenny ticket. Four halfpennies will do, and though it is hardly fair to worry the brains of the machine, it accepts farthings. But it is of no use to feed it with half or foreign coins. These are returned.

All the work is done by the operator in the box, who stands at the levers and shoots out the tickets at a great rate as the coins tumble into a receptacle below the levers. Those who watched the machine at work, and among them were railway men, said that undoubtedly the invention would prove its value, especially during the rush hours.

Saskatchewan Fisheries

Fresh Water Product to Value of \$300,000 Netted Annually In Province

The importance of the fresh water fisheries in Saskatchewan is indicated by the fact that approximately \$300,000 worth of fish are being caught in the lakes of this province and marketed annually, according to a report of the Department of Labor and Industries just published.

A considerable amount of money has been spent on the development of the fish business, the total investment in boats, gear, smoke houses, nets and other impediments being \$55,456.

The most popular fresh water fish on the market in the province is white fish. The total catch of this class of fish during the last fiscal year was 2,420,600 pounds, valued at \$212,869. This represents about two-thirds of the total fish catch of the province, the remainder of the catch being distributed between gold eyes, mullets, pickerel, pike, sturgeon, trout and tullibee.

The scarcest fish for marketing purposes is the gold eye. Just one ton of this fish was caught and marketed during the year, its valuation being \$240.

Beet Sugar In Canada

There are now three sugar factories in Canada which manufacture from Canadian sugar beets. They are situated in Western Ontario. Their annual production is about 38,000,000 pounds. About 15,000 acres are cultivated to beets.

Educating the Indian

Twelve Thousand Indian Children Attending School in Canada

There were 12,558 Indian children attending Indian schools throughout the Dominion during the past year, of which number somewhat the larger portion were girls. According to the annual report of the Department of Indian Affairs there were 326 Indian schools in operation, 253 being day, 68 boarding and 15 industrial. This shows a net increase of five schools over the previous year. The total enrolment in the day schools was 7,775; in the boarding schools 3,156, and in the industrial schools 1,627. The average attendance in the three classes of schools was 8,725, an increase of 1,091 over the previous year.

The course of study is that prescribed for the provincial, public and separate schools and is strictly adhered to.

Land for farming and gardening purposes as provided at practically all the residential schools. The pupils are thus enabled to get a general knowledge of agriculture. The granting of assistance to graduates is being continued. Upon leaving school an Indian girl may be given a sewing machine or household furniture; a boy may receive a cart of cattle, horses, implements, harness or building material. During the year under review 24 girls and 11 boy pupils were assisted to the extent of \$2,933.54.

The outlay on Indian education from parliamentary appropriation during the year amounted to \$1,112,409.63, of which \$18,000 was for the province of British Columbia and \$208,000 in Ontario.

Dominion Will Supply

Five Million Trees

Forestry Farm Plans Distribution For Planting in 1923

Five million trees are to be distributed among the farmers of the three prairie provinces from the Dominion Forestry Farm for planting in the spring of 1923, according to an announcement published by Norman M. Ross, superintendent of the farm. To secure these trees, Mr. Ross points out it is necessary to have applications sent in to him at Indian Head before March 1, 1922. The applications are required to be made a year ahead, in order that the department may be satisfied that a year's preparation of the soil is made before the trees are put into the ground on the farms.

Guernsey Cattle Association

The first Guernsey Cattle Association in Canada has been formed at Patricia, Alta., by a number of farmers interested in dairying. Arrangements have already been made to have two carloads of Guernsey cattle shipped to members of the association.

Hope deferred gives one cold feet.

Canada's Wheat Wizard Helps Western Farmers Through His Experiments

Emigration and Empire

Folly of Allowing British Citizens to Go to Foreign Countries

"The statement of the Empire are at last awake to the folly of allowing British citizens to go to foreign countries when the empty lands of Australia, New Zealand and Canada are crying aloud for population," the Auckland News says. "On the further development of such a policy the future of the Empire very largely depends. The United Kingdom has capital and surplus population, the Dominions offer land and opportunity. The problem of redistributing population and conserving British capital for the development of the young countries overseas will not prove insuperable if it is approached in the Empire spirit, and its solution will contribute much not only to the safety but the prosperity of the British nations."

Russians Coming to

Canadian West

Former Powerful Families Contemplate Farming in Prairie Provinces

Several wealthy Russians are negotiating for tracts of irrigated land in the southern districts of Alberta, and one Russian, A. Koukalovsky, has already arrived and secured a half section. In the days of the Czar, this Russian was employed in the diplomatic service, but was forced to flee with a number of his compatriots to Japan. He is the advance guard of five other former powerful Russian families who contemplate coming to the prairies to farm.

Alberta Cattle Are Winners

Every animal sent to the Chicago Livestock Show from the province of Alberta won a prize. Exhibits included Shorthorn and Hereford cattle and Percheron and Clydesdale horses. Among the prizes awarded was the Canadian Horse Breeders' Association trophy for mare, won by Hamilton Brothers, of Innisfail.

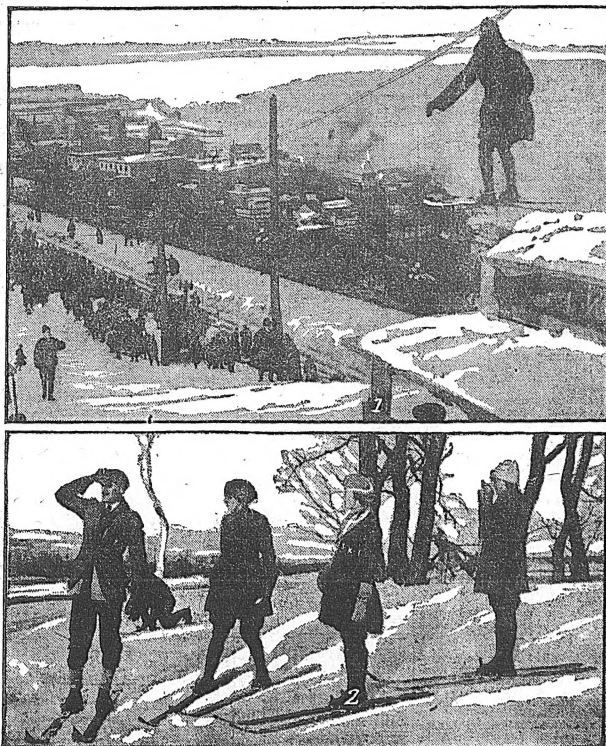

Big Timber Deal

A timber limit at Chilliwack, B.C., is reported sold for \$600,000 by Alex McLaren, of Buckingham, Quebec, to Westminster Mills. The property has been held by McLaren family for 35 years. McLaren still has extensive holdings on Vancouver Island.

People do wrong in trying to convince when they know very well that they did.

Give your local merchants a chance. Buy at home.

QUEBEC WINTER SPORTS

Swine For Peace River

Pure Bred Saskatchewan Stock Brought to Surrounding Communities

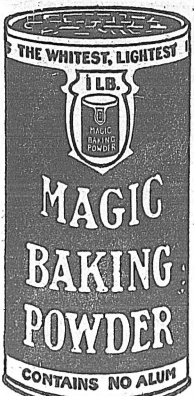

Swine bred on the Saskatchewan Institutional farms are finding their way into the Peace River country as a result of the policy of breeding pure bred stock on these farms inaugurated a couple of years ago.

Hon. A. P. McNab, minister of public works, states that the bulk of the pure bred sows raised on the various institutional farms have already been disposed of and 23 pure bred Yorkshire boars have been sold from the Prince Albert jail farm, and the mental asylum farm at North Battleford, to the sheep and swine division of the federal livestock branch for resale to farmers in the Peace River country in Alberta. These boars were all young stock, and averaged the satisfactory price of \$30 a head.

"The increase of pure bred stock at the Regina, Battleford and Prince Albert farms," said Mr. McNab, "has been a boon to the surrounding communities, and the fact that the federal Government, in selecting the best type of bacon hogs for the Peace River district, should have made such a heavy purchase in Saskatchewan, has been a source of much satisfaction to the Department of Public Works."

Ship Chilled Meat Via Panama
According to the Panama Canal record 3,500 tons of wheat from the Canadian Pacific coast passed through the canal between January 1st and August 31st en route to European ports. A consignment of 100 tons of mutton from Vancouver is said to have been the first shipment of chilled meat from Canada to Europe by way of the canal.

The oldest building in Rio de Janeiro is the Church of St. Sebastian, begun two years after the city was founded in 1565.

World Happenings Briefly Told

Thirty persons were baptized by immersion in the river at Llanlle, Wales. The ice had to be broken for the ceremony.

The former Austrian archduke and admiral, known as Leopold Woellgen, has accepted a position as advertising agent for a Vienna newspaper.

Fire losses in Canada during the week ended Dec. 21, are estimated by the Monetary Times at \$798,400, compared with \$457,500 the previous week.

The second chamber of the Dutch Parliament passed by fifty-seven to eighteen, the bill authorizing a loan in the United States for the Dutch East Indies.

Three hundred and fifty tenants of a downtown arcade building in Cleveland received Christmas presents in the form of rent reduction of ten to fifteen per cent.

With only his face showing above the water, Joseph Norwalk, wanted for grand larceny, was found by officers in an abandoned well under the kitchen of his home in Toledo, O.

A fund has been allotted by the directors of the Montreal Star to provide 50,000 meals for the unemployed men of Montreal and their families. A large hall is being fitted up for the purpose.

First death of a passenger on the Illinois Central suburban service in Chicago since its establishment nearly 50 years ago, occurred recently when two trains collided. Service accommodates an average of 2,500,000 passengers daily.

With December's collections estimated at \$1,000,000, the total collections at the port of Vancouver for 1921 are \$12,662,772, according to figures given out by the customs department there. This represents an increase of more than two millions over 1920, and more than four millions over 1919.

Will your "Good Morning" last all day?

Easy to start from the breakfast table with zest and enthusiasm, but how easy is it to keep on? Does ambition last, or lag, as the day develops?

The afternoon "slump" is a factor to be counted upon, in business or social life.

Usually, there's a reason.

Nerves whipped by tea or coffee won't keep on running, and they won't stand constant whipping.

Many a man or woman who has wished the afternoon would be as bright as the morning has simply been wishing that the nerves wouldn't have to pay the natural penalty for being whipped with the caffeine drug.

Postum gives a breakfast cup of comfort and cheer, without any penalties afterward. There's no "letting down" from Postum—no midday drowsiness to make up for midnight wakefulness; no headaches; no nervous indigestion; no increase of blood pressure.

Think it over. There's full satisfaction in Postum—a cup of comfort for anybody (the children included), any time.

You can get Postum from your grocer or your waiter today, and probably you'll begin to have better tomorrow, as so many thousands have had, who have made the change from tea and coffee to Postum.

Postum comes in two forms: Instant Postum (in tin) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes. Sold by all grocers.

Postum for Health "There's a Reason"

Civilization Bad For Eskimo

Traveller Predicts that Eskimo Tribes Will Soon Be Extinct
Members of the Eskimo tribes, who total upwards of 5,000 persons, will be extinct during the lifetime of people now living, according to a prophecy made in Toronto by S. Sainsbury, who spent ten years in the Arctic regions of Baffin's Land and Hudson's Bay. He declared the effect of civilization on the Eskimo was appalling, their health and stamina breaking down completely. The chief cause of their physical deterioration is the introduction of civilized foods, white flour being particularly disastrous in its effects.

Valuable Clay In Alberta

Suitable for Manufacturing Brick and Tile Drain

The story of a pronounced disability disclosing itself as a valuable asset comes from the Smoky River country along the line of the Edmonton, Dunvegan and British Columbia railway. Engineers of the road had ceaseless trouble in maintaining the approach to the crossing of the river owing to the continual sliding of the clay of which the banks are composed. Now it appears after examination that these clays, of which there is an enormous quantity, are valuable for the manufacture of brick and tile drain, and may in time give birth to an industry, the traffic of which should compensate the railroad for some of the trouble it has experienced.

KEEP LITTLE ONES WELL IN WINTER

Winter is a dangerous season for the little ones. The days are so changeable—one bright, the next cold and stormy, that the mother is afraid to take the children out for the fresh air and exercise they need so much. In consequence they are often cooped up in overheated, badly ventilated rooms and are soon seized with colds or grippe. What is needed to keep the little ones well is Baby's Own Tablets. They will regulate the stomach and bowels and drive out colds and by their use the baby will be able to take the winter season in perfect safety. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Calgary Has Dahlia Show

Some of Blooms Entered Measured Eight inches in Diameter
Calgary gardeners have demonstrated that the pessimistic prophets of twenty years ago were lacking in vision in respect to certain flowers, such as dahlias. The first dahlia show has just been held in the city and nearly 2,000 flowers were entered. Some of these were from six to eight inches in diameter and the hues were particularly vivid and gorgeous.

Might Be

Patron (crossly).—Say, waiter, what are these black specks in my meat?

Waiter (after a close inspection).—Dunno, sir, unless it's some of them vitamins everyone is talking about now.—Life.

Marketing Seriously

BY LORETTO C. LYNCH

An Acknowledged Expert in All Matters Pertaining to Household Management.

Have you ever taken marketing seriously? Of course every woman who keeps house has to buy provisions. But too many women run into the nearest store at the last moment and buy anything at all for the meal. This is the most expensive way of doing one's marketing. Much time and labor and anxiety are saved if the meals are planned on paper for at least a few days ahead. Then one knows just what shall be needed. Potatoes, rice, winter vegetables, canned goods and things that do not spoil easily may be purchased at one time and then set aside. Fish when it is fresh spoils easily and it is best to shop for this at the last moment or if it is purchased in advance, it must be covered with sufficient cracked ice to keep it.

But in marketing for anything it is best to go to the store yourself. Select for yourself the article you desire to purchase and inquire its price. Allow yourself sufficient time to visit other stores and inquire the price of a similar article. It is only by careful comparison of quality and weight or measure and price that we may know which shop is really the cheaper.

You are entitled to all the trimmings of the piece of meat you buy. The butcher trims off these and sometimes removes the bone and throws them into a box under the counter. These are sold to someone else. Even a small amount of trimmings and a bone will be enough for the basis of a soup for two.

Hand to mouth living or buying is to be deplored. Unfortunately, some must live this way. But many who run accounts might do much better if they made an effort to get together two or three dollars in cash and then shopped where the very most can be gotten for the money.

Whenever possible, buy in bulk, and not in fancy packages. Food that is wrapped in attractive looking packages must of necessity cost more. Buy by the pound that is loose—in bulk anything which must be cooked before being eaten. This includes the cereals, the dried fruits and many other articles of the diet. It is perhaps better to choose foods in packages if they are to be eaten without further cooking. An example of this is food in the cracker or cookie. Study your bills, for every careful housewife sees to it that she gets a bill with each purchase, or at least she writes down what she purchases and how much it costs. Careful marketing will reduce bills anywhere from ten to twenty per cent. in a given time. And such a saving is decidedly worth while.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Expeller will clear the stomach and intestines and restore healthfulness.

Spider's Web is Marvel of Strength

No Rope For Its Size Is Nearly As Strong

The web of the spider is a marvel of strength. No rope that man can make is, for its size, anything like as strong as the spider's web. The smallest rope that will bear the weight of a man is an inch in circumference, or one-third of an inch in thickness. To equal the spider's average daily performance a man six feet tall would have to carry about a half of mile of one inch rope, which would be a physical impossibility.

Final Hearing of Freight Rates

George E. Carpenter, secretary of the prairie branch of the Canadian Manufacturers' Association, has been informed that the Board of Railway Commissioners will meet Feb. 15, in Ottawa, for the final hearing on the equalization of freight rates between Eastern and Western Canada, and British Columbia and the prairie provinces.

Increase in Wheat Receipts

It is reported that wheat receipts of the Saskatchewan Co-operative Elevator Company for the past season total 22,000,000 bushels. This is 3,000,000 bushels more than last year at this time.

Your attention is drawn to the advertisement of the Metal Shingle & Sliding Co., Ltd., appearing in another column of this issue. Farmers and others will do well to take advantage of their exceptional offer.

His Sad Fate
Traveller (at remote station).—Have you a 'Sporting Life'?
Bookstall Clerk.—No—not very.

THAT DRY COUGH IS BRONCHITIS

If neglected, it will weaken the throat and perhaps reach the lungs. Nothing surer to help you quickly than the healing soothing vapor of Catarrhine. It's action is magical, every congested spot is healed, irritation is soothed away, phlegm and secretion are cleaned out, all symptoms of wet throat, Catarrh, Bronchitis disappears. Catarrhine is a genuine, scientific preparation. Sold everywhere in three sizes, 25c, 50c and one dollar for a complete two months' treatment. Prepared by the Catarrhine Co., Montreal.

Canadian Forest Tree Seeds

A Hopeful Sign in Regard to Forest Conservation

During the season of 1920, the work of collecting the cones of coniferous trees for reforestation purposes went on in practically all the provinces. The work was, perhaps, most vigorously pressed in the west where the Dominion Forestry Branch collects seed for its own forest nurseries and for the Forestry Commission of Great Britain, but, to a greater or less extent, it was done in all the provinces, either by government or private individuals. This is a hopeful sign in regard to forest conservation.

MANY CHILDREN SICK HOW TO TREAT THEM

The kiddies will get their feet wet, catch cold, get grouchy and give their mothers loads of trouble. With the first cough or sneeze, rub the little one's chest with Nerviline, rub it on plentifully, it can't harm. Then make a gargle with Nerviline and water, and have the child gargle for five minutes. Just at bed time, give the child ten drops of Nerviline in hot sweetened water. The result is, in the next morning child is better. Nerviline is a great protection in the winter. Large 50c bottles at all dealers.

Aeroplane Stunts Are Barred

A New Clause Is Added to the Air Regulations

Acrobatic tricks involving entering or leaving an aeroplane while in flight, are barred out under a new clause which has been added to the air regulations. The clause reads as follows: "No person shall enter or attempt to enter any aircraft in flight; or leave or attempt to leave any aircraft in flight, except for the purpose of making a parachute descent; or give up any aircraft in flight; any gymnastic or other like exhibition."

CATARRAHAL DEAFNESS

Is greatly relieved by constitutional treatment. HALL'S CATARRH MEDICINE cures catarrhal deafness. Catarrhal Deafness is caused by an inflammation of the middle ear, the Eustachian tube. When this tube is inflamed it causes a running noise or imperfect hearing, and when it is entirely closed, deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood, reducing the inflammation of the Eustachian tube in restoring normal conditions. Cures free. All Druggists. J. J. Cheney & Co., Toledo, Ohio.

Hours For Female Workers

Manitoba Issues Regulations For Forty-Eight Hour Week

The minimum wage board of the province of Manitoba has issued regulations requiring that female workers in industries in the province shall not work for more than nine hours per day, or 48 hours per week. All night work or Sunday work is prohibited absolutely, while overtime can be worked only on permit from the Provincial Bureau of Labor, and not often than 30 days in any year.

Solid Achievement

The Washington conference for the limitation of armaments has arranged a Pacific league of nations to prevent and settle disputes, has arranged the trouble over the island of Yap between Japan and the United States, has freed China from foreign control of postal services and has started other causes of possible dispute towards adjustment. The members of the gathering appear to have had their hearts in the job their countries gave them to do.—The Montreal Gazette.

Like a Grip at the Throat. For a disease that is not classed as fatal there is probably none that causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally through the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a reliable remedial agent. It immediately relieves the restricted air passages as many can testify. It is sold by dealers everywhere.

Motor Cars in Prairie Provinces
Of a total of 400,000 motor cars in commission in Canada, 156,654 are located in the Western Provinces. In Manitoba there are 28,815; in Saskatchewan, 58,825; in Alberta, 36,615; and in British Columbia, 26,500.

Minard's Liniment For Diphtheria

Wise parents aren't above apologizing to their children.

Wrap of Black Duvetyn And Hudson Seal

By Marie Belmont

A coat which can adapt itself to varied occasions is a very desirable one to possess. This versatility of use finds expression here in black duvetyn trimmed in Hudson seal.

The wrap is built on loose lines, this effect being carried out in the single button fastening and the dropped shoulder seams. The chin collar is becoming and gives additional warmth. The finishing band of fur at the hemline is attractive for a person of sufficient height, but should be avoided by one of very short stature.

This coat is attractive over afternoon frocks of black or color, and can also be used for evening wear.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surfaces. Miller's Worm Powder will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Elevator Destroyed

Was Loaded to the Roof With Grain and Flour

The 35,000 bushel elevator of Northern Elevator Company at Orinda, first building west of Yorkton, Saskatchewan, was totally destroyed. It was full to the roof with grain and considerable supplies of flour in an adjoining warehouse were also destroyed.

One railway car was burned, but a long string was saved by prompt action of a thorough freight crew, which pulled them to safety.

Making Them Useful

Traveller.—"It's a nuisance—these trains are always late."
Resourceful Conductor.—"But, my dear sir, what would be the use of the waiting-rooms if they were on time?"—Numero, Turin.

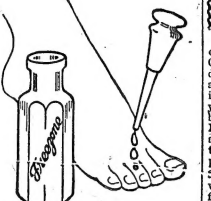

There are 5,000 living animals of 1,000 species located in the New York Zoological Garden and more are added yearly.

Minard's Liniment For Garget in Cows

New York has theatres playing in six different tongues, and newspapers printed in 20 foreign languages.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the cause, without soreness or irritation.

Cuticura Is Just Right For Baby's Tender Skin

Keeps him with Cuticura Soap and warm water. Dry gently and if any sign of redness, roughness, irritation or rash is present, anoint with Cuticura Ointment to soothe, soothe and heal. Finally dust on a few grains of the fragrant, delicately medicated Cuticura Talcum.

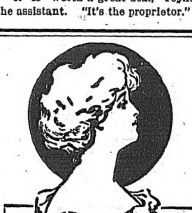

Sole U.S. Distributors, The J. C. Taylor Co., Sold throughout the Dominion. Canadian Depot: The J. C. Taylor Co., Ltd., 111 St. W., Toronto.

Rebuilding Copper Concentrator

Will Cost Britannia Mines \$500,000 for Reconstruction

Tenders have been closed for the rebuilding of the concentrator at the Britannia Copper Mines, Britannia Beach, British Columbia. It is understood that the cost of construction will be over \$500,000. The Britannia Copper Mines are the second largest copper mines in the British Empire.

The Priceless Image
A short-elighted old lady went into a large curio shop. After pottering about for some time she asked the assistant: "How much is that Japanese idol worth—the one near the door?"
"It is worth a great deal," replied the assistant. "It's the proprietor."

BEAUTY OF THE SKIN

Is the natural desire of every woman, and is the desire of every man. Dr. Chase's Ointment. Pimples, blackheads, roughness and redness of the skin, irritation and eczema disappear, and the skin is left soft, smooth and velvety. All dealers, or Edmonson, Bates & Co., Ltd., Toronto. Sample free if you mention this paper.

How to Feed and How to Cure. Address by the Author, R. CLAY HOGGER, D.V.M., 118 West 114th Street, New York, U.S.A.

THIN, FLAT HAIR

GROWS LONG, THICK AND ABUNDANT

"Danderine" costs only 35 cents a bottle. One application ends all dandruff, stops itching and falling hair, and, in a few days, you have doubled the beauty of your hair. It will support a mass of soft, lustrous, and easy to do up. But what will please you most will be that a few weeks use when you see your hair fine and downy at first—yes—but really new hair growing!—and you have scalp. "Danderine" is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. This delightful, stimulating tonic helps thin, lifeless, faded hair to grow long, thick, heavy and luxuriant.

Loyalist, 25 miles north of Chinook

Wrestling Match on 23rd

Jack Morris, of Chinook, will
wrestle with Gus Adams in the
Arms' hall on January 23rd.
Watch The Advance advertising
columns next week for further
particulars.

With the adoption of steel pas-
senger coaches, came greater
safety and greater riding comfort
—but also increased operating ex-
penses. Steel cars are not only
more costly to construct, but also
cost more to haul because of the
fact that they increase immen-
sely the weight of the train. The
Canadian National Railways op-
erate a greater proportion of
steel coaches than any other Cana-
dian railway. The steel car is so
heavy that it is generally confined
to main line use on transconti-
nental runs.

Canada, whether certain in-
dividuals approve or not, is the
owner of 22,000 miles of railways
together with the rolling stock
and equipment necessary to op-
erate the same. This gigantic
plant can be rapidly and perman-
ently changed from a losing to a
paying venture if and when the
Canadian people decide that they
will give their own railroad a fair
and equitable share of the exist-
ing passenger and freight traffic
of the country.
